## [Linux File Server For Mac Os X](#)

The screenshot shows a file manager window with a menu bar (File, Edit, View, Transfer, Server, Bookmarks, Help) and a toolbar. The connection settings are: Host: sftp://sftpmath.ma, Username: username, Password: [masked], Port: [empty], and Quickconnect: [dropdown].

The interface is split into two main panes. The left pane shows the local site at /username/ with a tree view of directories: /, .kde, bin, boot, dev, etc, and hg. Below this is a table of local files:

Filename	Filesize	Filetype	Last modified
..			
.Spotlight-V...		Directory	03/11/2016 03:...
.TSprofile		Directory	12/04/2018 07:...
.Trash		Directory	08/08/2016 03:...
.adobe		Directory	12/02/2016 10:...
.cache		Directory	12/04/2019 09:...
.claws-mail		Directory	12/02/2016 10:...
.config		Directory	12/04/2019 09:...
.dbus		Directory	02/18/2016 10:...
.devilspie		Directory	02/22/2012 06:...

Summary: 29 files and 40 directories. Total size: At least 263,012 bytes.

The right pane shows the remote site, which is currently "Not connected to any server".

At the bottom, there is a status bar with tabs for "Queued files", "Failed transfers", and "Successful transfers".
